PROFESSIONAL SUMMARY

Dynamic and skilled Java Full Stack Developer with strong expertise in Java, Spring Boot, Microservices, **RESTful APIs** and modern front-end technologies. Delivered 3 real-time projects for a research community company. Proven track record of developing 20+ personal projects including Spring Boot web application using **Stripe Payment Integration**, Desktop Application, JSP based web Application, and Microservices using **Spring Cloud**, responsive websites. Passionate about building, scalable, efficient and user-friendly application using latest technologies.

TECHNICAL SKILLS

Back End : Java, Spring Security, JWT Authentication

Front End : HTML, CSS, Bootstrap, JavaScript, JSP, Thymeleaf, Java Swing

Database : MySQL ,Microsoft SQL Server(MSSQL)

Frameworks : Spring Boot, Hibernate, Spring Data JPA, RESTful APIs,

API Tools : Swagger UI, Postman

IDE Tools : Apache Netbeans, Eclipse, IntelliJ IDEA, Spring Suite Tool, VS Code, MySQL Workbench

Build Tools : Maven ,Gradle

PROFESSIONAL EXPERIENCE

Software Developer(Java Full Stack Developer)

Research Community Company [2025 - Present]

PROJECT 1 : SHAGUN CATERERS AND DECORATORS WEB BASED APPLICATION

Role : Java Full Stack Developer **| Tech Stack :** Java , Spring Boot, Spring Data JPA, Thymeleaf, Stripe API,

Java Mail Service API, Chart.js, Bootstrap, JavaScript, MSSQL

Project Description :

- Developed a secure Spring Boot-based web application handling 100+ users with **Stripe Payment Integration** to manage complete event operations including booking, customer management, catering & decoration services, staff allocation, inventory, payment, and analytics.
- Implemented a robust three-tier **role-based** architecture (Admin, Customer, Staff) with **AES Encryption** for password & phone number, session management, **Stripe payment integration**, automated email invoices via J**ava Mail Service API**, and dynamic staff assignment with reallocation logic.
- Built advanced dashboards with **JPQL** -powered reports and **Chart.js** visualizations for revenue trends, inventory, top-selling categories, booking patterns, staff performance, and upcoming events, while providing customers seamless service browsing, direct booking, and secure contact features.

PROJECT 2 : AYYA VEGETABLE AND RICE SHOP WEB BASED APPLICATION

Role : Java full stack developer |**Tech Stack :** Java, Spring Boot, Spring Data JPA, Thymeleaf, Stripe API, Java Mail Service API, Chart.js, Bootstrap, JavaScript, MSSQL

Project Description :

- Architected a secure Spring Boot web application handling 200+ orders/transactions with **Stripe Payment integration** for Ayya Vegetable and Rice Shop to streamline daily store operations including product inventory, customer orders, billing, staff allocation, and comprehensive analytics.
- Engineered a robust three-tier **role-based** system (Admin, Customer, Staff) with **AES Encryption** for passwords & phone numbers, session-based authentication, automated staff assignment for orders, **Stripe Payment Integration**, and automated email invoices using **Java Mail Service API.**
- Integrated powerful dashboards with **JPQL**-powered reports and **Chart.js** visualizations for inventory tracking, monthly revenue, top-selling products, **order trends,** peak sales, staff performance, daily deliveries, and collections, while providing customers seamless browsing, direct ordering, payment history, secure contact features.

PROJECT 3 : SAI PET CARE DESKTOP APPLICATION

Role : Java Developer |**Tech Stack :** Java, Java Swing, JFreeChart, JDBC, MSSQL

Project Description :

- Expanded a robust Java Swing desktop application for **Sai Pet Care** to efficiently manage pet clinic and pet shop operations, including pet registration, appointment scheduling, customer management, billing, inventory tracking, and service reports.
- Enforced a two-tier **role-based system** (Admin and Employee) with full admin access to dashboards and **CRUD** operations for customers, staff (Normal & Veterinary), service, veterinary services, appointments, pet sales, and pet products, while employees are restricted to the user dashboard only.
- Designed **52 JFrame-based screens** with automated features such as Random-generated IDs for pets, appointments, and receipts, integrated bill delivery, print & PDF options, **JFreeChart** reports for service vs price, pet vs price, pet product analytics, using **JDBC** with **Microsoft SQL Server**.

ADDITIONAL PROJECT

PROJECT : STORE MANAGEMENT MICROSERVICES APPLICATION

TECH STACK: Java, Spring Boot, Spring Data JPA, Thymeleaf, Spring Cloud(API Gateway), RESTful APIs ,MSSQL

Project Description :

Developed a small-scale **Microservices-based** Product and Order Management System using **Spring Boot** and **Spring Cloud**. The architecture consists of four independent services Product Inventory, Order Inventory, **API Gateway** (with **YAML routing** configuration), and Store Management frontend each running on **separate port**. Implemented **RESTful APIs** with **Repository-Service-Controller** layer in Product and Order Service, Integrated Thymeleaf based on frontend using **RestTemplate via API Gateway** for viewing and managing product and order details and thoroughly tested all endpoints using **Postman**.

Additionally developed 20+ personal projects including multiple **RESTful APIs**, Spring Boot and JSP Servlet based web application and responsive frontend mini project .Full portfolio available on GitHub.

CERTIFICATION :

Java Full Stack Developer Intern (Kaashiv Info Tech, chennai)

LANGUAGE :

Tamil, English

EDUCATION

B.E Mechanical Engineering-2021/ **CGPA**-7.54

New Prince Shri Bhavani College of Engineering and Technology/ Anna University, Chennai
