PROFESSIONAL SUMMARY

Result-driven Full Stack Java Developer with 1+ years of hands-on experience in designing and building scalable, secure web applications. Skilled in end-to-end development using **Java**, **Spring Boot**, **Spring Security** and **Microservices architecture** with **API Gateway (Spring Cloud)** and **Spring Data JPA** for robust backend systems, along with **React.js**, **HTML5**, **CSS3**, and **JavaScript** for building responsive, intuitive user interfaces. Proven experience integrating secure payment gateways (**Stripe**) and automated notification systems (**Java Mail Service**). Strong foundation in Object-Oriented Programming, **File Handling**, **Exception Handling**, **Lambda Expressions**, **Collections Framework**, and **Multithreading**, with a passion for writing clean, efficient, and maintainable code.

TECHNICAL SKILLS

- **Languages** : Core Java(OOPS, File Handling, Exception Handling, Collections, Multithreading, Stream API, Lambda Expressions, Optional)
- **Backend Frameworks** : Spring Boot, Spring MVC, Spring Security(JWT), Microservices, Spring Data JPA, JDBC, Servlets
- **Frontend** : React JS, HTML, CSS, JavaScript, Bootstrap, JQuery, JSP, Thymeleaf, Java Swing
- **ORM Tools** : Hibernate
- **Database** : MySQL, Microsoft SQL Server(MSSQL)
- **API & Tools** : RESTful APIs, Postman, Swagger UI
- **Development Tools** : IntelliJ IDEA, Eclipse, STS, VS Code, NetBeans, MySQL Workbench
- **Version Control & Build** : Git, GitHub, Maven, Gradle
- **Basic Concept** : Docker, CI/CD Pipeline, AWS(EC2, S3, Lambda), Kafka, Redis

EXPERIENCE

Full Stack Java Developer | Research Community Technologies

August 2025 - Present

- Developed and deployed robust Full Stack Java applications(**Booking & E-commerce** systems) using **Spring Boot**, **Spring Data JPA**, and **MSSQL**, featuring secure **AES-encrypted** login credentials and **3-tier role-based** access control (Admin, Staff, Customer).
- Integrated **Stripe Payment Gateway** for secure transactions and implemented **Java Mail Service** for automated, personalized billing and transactions notifications.
- Designed responsive, user-friendly interfaces using **thymeleaf**, **bootstrap**, and **JavaScript**, ensuring high performance and seamless cross-platform functionality.
- Developed high-performance Desktop applications using **Java Swing** implementing **Multithreading** for smooth UI responsiveness and **Store Procedure** for efficient database operations in **MSSQL**.
- Integrated **JFreeChart** to visualize complex data and generate dynamic analytical reports, while leveraging **Java OOPS**, and **Collections** to manage high-volume data structures effectively.

PROJECTS

EVENT MANAGEMENT & CATERING BOOKING PLATFORM

Client : Shagun Groups | **Role** : Full Stack Java Developer | **Tech Stack** : Java, Spring MVC, Spring Boot, Spring Data JPA, ThymeLeaf, Stripe API, Java Mail Service, Chart.JS, HTML, CSS, JS, Bootstrap, MSSQL Server

- Engineered a secure **Spring Boot** Event Management System with integrated **Stripe payments** and automated Java Mail invoicing.
- Implemented **AES-encrypted** role-based access with dynamic staff allocation and built advanced analytical dashboards using **Chart.JS** and **JPQL** to effectively visualize revenue trends, inventory tracking, and operational performance

SMART INVENTORY & RETAIL APPLICATION SYSTEM

Client : Ayya Shop | **Role** : Full Stack Java Developer | **Tech Stack** : Java, Spring MVC, Spring Boot, Spring Data JPA, ThymeLeaf, Stripe API, Java Mail Service, Chart.JS, HTML, CSS, JS, Bootstrap, MSSQL Server

- Developed a secure Spring Boot e-commerce platform with **Stripe-integrated** payments and automated **Java Mail** invoicing, successfully managing 200+ transactions.
- Implemented a **three-tier RBAC** system with **AES** encryption and built interactive **Chart.js/JPQL** dashboards to monitor real-time revenue trends, inventory levels, and operational performance.

VETERINARY CLINIC & PET HEALTHCARE DESKTOP APPLICATION

Client : Sai Pet Shop | **Role** : Java Developer | **Tech Stack** : Java, Java Swing JFreeChart, JDBC, MSSQL Server

- Developed a **Java Swing** desktop application with **JDBC** and **MSSQL** to streamline pet clinic workflow, including registrations, appointments, and automated billing.
- Implemented a secure **two-tier Role-based** access system across **52 JFrames** and integrated **JFreeChart** for real-time business analytics, improving decision-making **efficiency** by **25%**.

STORE MANAGEMENT WEB APPLICATION USING MICROSERVICES ARCHITECTURE

Tech Stack : Java, Spring Boot, Spring Data JPA, Spring Cloud(API Gateway), Rest Template, YAML Configuration, Restful APIs, MSSQL

- Architected a **Microservice-based system** with independent Product and Order service, featuring **API Gateway (YAML routing)** and **RestTemplate**-based communication across separate ports.
- Built robust **RESTful APIs** with robust **Repository-Service-Controller** architecture and integrated a **ThymeLeaf** frontend via **API Gateway** for seamless management of product and order inventory.

CERTIFICATION

Full Stack Java Developer Intern (kaashiv Info Tech, Chennai)

EDUCATION

New Prince Shri Bhavani College of Engineering and Technology / Anna University, Chennai.

B.E Mechanical Engineering – 2021 / CGPA - 7.54

LANGUAGE

Tamil, English
